**PLANNING BOARD
GRAFTON, MA**

EXHIBIT
#8

Cecelia,

Thank you for the information.

I appreciate the information that you have collected and are willing to share. However I don't believe that I am the best audience to share this information with.

I understand that the information in this email is intended to be shared with the Planning Board at the upcoming public hearing for a wireless facility at 30 Grafton Common. I will be submitting this email to Board for inclusion on the record for the public hearing.

Local approval of wireless facilities is constrained by FCC regulations. I anticipate our wireless consultant will address this with the audience and the Board. The Fact is that the Board can not take into consideration health impacts during the public hearing and that our consultant will be reviewing submitted information to verify compliance with FCC guidelines.

I appreciate the issues you raise and the unknown impacts wireless transmissions may have on all of us. I know that we may not know for some time the impact on exposure, however as related to the application for 30 Grafton Common, health impacts can not be considered as long as they comply with established standards.

Thank you again for your email.

Sincerely

Joe
